

As part of joining the in-person class, you get a bonus! I didn't tell you about it, but you now have access to the pre-recorded version of the class too. I hope you see this as an added value. You can watch the lesson over and over as you try projects and want to revisit things. You not only got to meet me in person to ask questions, but you also get everything an "on-demand" customer would get too. The video is unsecured. Anyone with the link can watch it. So we're on the honor system here...I'm trusting you to not pass on the link. If you like it, maybe you'll be open to purchasing one of our other on-demand classes. Feel free to tell people about the class and encourage them to sign up just as you did through our website trigablelea.com. We're hoping this model of teaching can help us sustain the farm over the long-run.

If you like this class, the companion class to this is our No-Till Gardening Class where I teach you how to start, enlarge and maintain a weed free, low maintenance garden. As you'll learn, mushrooms are an integral part of providing organic fertility to a garden! It is available on-demand here...
